el libro manual de neurocirugía esencial para estudiantes de medicina médicos generales y residentes surge como un

sueño de uno de los autores principales y que fue tomando forma conforme pasaban los años y se iban sumando aún más profesionales que querían compartir enseñanzas y sus saberes con el fin de transmitir valiosa información académica a nuevas generaciones y dejar así un enorme legado esta obra tiene como objetivo y fin último aportar conocimientos por lo que se clasifica como un libro de docencia consulta y formación académica para estudiantes de medicina médicos generales y residentes en este se lograron compilar los temas neuroquirúrgicos más importantes y que todo profesional en medicina y especialista de neurocirugía debe manejar a partir de experiencias propias de los autores en el ejercicio de la medicina general especializada en neurocirugía e incluso subespecializada en ramas más específicas de la neurocirugía

introducing comprehensive neurosurgery with 118 chapters organized into 8 sections in two volumes and each section has been reviewed by eminent neurosurgeons this book is meant to serve as a comprehensive guide for neurosurgical trainees young neurosurgeons and those in allied disciplines who participate in neurological care volume 2 deals with pathology and management of tumours increasing interest in degenerative spine in addition to spinal cord lesions and the emerging specialty restorative neurology this book intends to be a guide to trainees young neurosurgeons and those in allied disciplines wide spectrum of neurosurgical disorders are covered with 118 chapters organized into 8 sections and 2 volumes each of the eight sections has been critically reviewed by eminent surgeons each chapter specifically attempts to draw together all up to date relevant information and integrate theory and practice for a comprehensive learning the concise and practical style is deliberately chosen for easy use comprehensive neurosurgery is the medical specialty concerned with the prevention diagnosis treatment and rehabilitation of disorders which affect the spine the brain and the nervous system within the head and cervical canal comprehensive neurosurgery can be broadly categorized into two categories namely surgical neurosurgery concerned with the operative treatment of disease and non surgical neurosurgery concerned with the management and rehabilitation of patients with acquired brain insults neurosurgery is a surgical specialty that deals with the human nervous system it is both an operating room procedure and a diagnostic procedure the procedure of neurosurgery deals with the brain spinal cord and peripheral nerves some of the operations of neurosurgery that you can find in this blog are pituitary tumor surgery brain tumor

surgery and the craniotomy procedure besides the surgical operations comprehensive neurosurgery also deals with diagnostic procedures like the myelogram spinal taps brain biopsy and the eeg test each chapter specifically attempts to draw together all up to date relevant information and integrate theory and practice for a comprehensive learning in a concise and practical style

neuromonitoring is the tool of trade in intensive care and should incorporate cutting edge technology with patience repeated clinical observation careful identification of neuroworsening the aim of the book is to be of practical use and to assist the clinical practice of the busy physician the clinical examination belongs to the introductory section of the book and an abundance of technology with specific emphasis on the importance of intracranial pressure comes in the following parts since the patient with an injured brain can have chances only if other organs and systems as the lungs and the acid base equilibrium etc are preserved a section of the book covers the interactions between the affected brain and other organs the way the brain reacts to different insults has common aspects as inflammatory responses edema etc but also specific features sections five to nine summarize the most relevant pathologies from ischemic to hemorrhagic lesions trauma tumors etc and also mentions new comers as the specific problems related to the expanding field of neuroradiological interventions finally neurointensive care does not exist without knowledgeable nurses the intracranial pressure measurement starts or unfortunately ends with a catheter well maintained and that becomes vital when the drainage of hydrocephalus is concerned dealing with patients with severe brain damage has plenty of ethical implications up to the problems related to brain death and organ donation this book is published in two volumes

operator skills and in particular decision making and strategic skills are the most critical factor for the outcome of catheter based cardiovascular interventions currently such skills are commonly developed by the empirical trial and error method only in this textbook for the first time an explicit teaching training and learning approach is set out that will enable interventional operators whether cardiologists vascular surgeons vascular specialists or radiologists to learn about and to develop the cognitive skills required in order to achieve consistent expert level catheter based interventions it is anticipated that adoption of this approach will allow catheter based interventions to become a domain

of excellence with rapid transfer of knowledge steep learning curves and highly efficient acquisition of complex skills by individual operators all of which are essential to meet successfully the challenges of modern cardiovascular care
